

Ahmed Sharaf Ghazy

Full-Stack Software Engineer

Cairo, Egypt | aahmedsharaff@gmail.com | +20 111 565 5645
[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

Full-Stack Software Engineer specializing in React.js, Next.js, TypeScript, and Node.js with hands-on experience architecting and delivering production SaaS platforms, CRM systems, and e-commerce applications end-to-end. Currently serving as the **sole engineer at Fateen Agency**, owning the entire software development lifecycle — from system design through production deployment. Built a multi-tenant WhatsApp CRM platform (comparable to WATI/Respond.io) featuring real-time Socket.IO messaging, BullMQ automation flows, and a visual broadcast engine. Strong command of system architecture, REST API design, authentication, performance optimization, and database modelling across both SQL (PostgreSQL/Prisma) and NoSQL (MongoDB) stacks. Comfortable working remotely and delivering complex features independently.

Technical Skills

Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Context API, Tailwind CSS, shadcn/ui, Material UI, Framer Motion, Socket.IO Client, WCAG/ARIA
Backend:	Node.js, Express.js, PostgreSQL, Prisma ORM, MongoDB, Mongoose, Socket.IO, BullMQ, Redis, REST APIs, JWT Authentication, Stripe Integration
DevOps & Tools:	Git, GitHub, Docker (basic), CI/CD, Vercel, Netlify, AWS (EC2, S3), Postman
Testing:	Jest, React Testing Library, Cypress (basic)

Professional Experience

Software Engineer — Fateen Agency

Saudi Arabia · Remote · Full-time

Feb 2026 – Present

- Serve as the **sole software engineer** at Fateen Agency, owning the full software development lifecycle across all web-based products — from requirements analysis and system design to deployment and ongoing maintenance.
- Design and build scalable, high-performance full-stack applications using Next.js, React, Node.js, and PostgreSQL with clean architecture and maintainable code standards.
- Integrate third-party APIs including payment gateways, analytics platforms, and external services across multiple client-facing projects.
- Collaborate directly with designers and non-technical stakeholders to translate business requirements into reliable, production-grade technical solutions.
- Continuously improve system stability, performance, and scalability while managing multiple projects simultaneously as the organisation's only engineer.

Frontend / Full-Stack Developer — ShopSmart (E-Commerce Platform)

Cairo, Egypt

May 2025 – Dec 2025

- Built a full-stack MERN e-commerce system with products, cart, orders, and payments.
- Designed and integrated backend APIs using Express.js and MongoDB.
- Implemented secure Stripe payment processing via backend endpoints.
- Improved conversion rate by **22%** through UX and performance optimisations.
- Improved overall system performance by **35%** using code splitting and image optimisation.
- Delivered accessible UI following WCAG/ARIA standards.

Frontend / Full-Stack Developer — HotelEase (Hotel Booking Platform)

Cairo, Egypt

Jul 2024 – Dec 2024

- Contributed to the system architecture of a MERN-based hotel booking platform with separated frontend and backend services.
- Implemented Server-Side Rendering (SSR) using Next.js, reducing initial page load time by **25%**.
- Integrated frontend with booking, availability, and authentication APIs.

- Mapped MongoDB data models (hotels, rooms, reservations) to frontend state.
- Implemented secure JWT authentication and role-based access control.
- Reduced booking failures by **18%**.

Frontend / Full-Stack Developer — ELITE (AI Legal Chatbot)

Jan 2024 – Jun 2024

Remote

- Designed a modular frontend architecture using reusable components and centralised state management.
- Collaborated on REST API design and integrated AI services via secure backend endpoints.
- Implemented JWT-based authentication and protected routing.
- Improved interaction and authentication performance by **30%**.
- Reduced failed API calls by **15%** through improved error handling.
- Applied lazy loading and code splitting, reducing load time by **28%**.

UI/UX Developer — Freelance

Jun 2022 – Jun 2023

Remote

- Delivered responsive websites for startups and SMEs, improving engagement by **15%**.
- Built reusable UI components and integrated REST APIs.
- Optimised frontend performance and cross-browser compatibility.

Selected Projects

★ FEATURED PROJECT

2026

WhatsApp CRM System — Multi-Tenant SaaS Platform

Next.js 16, React 18, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Socket.IO, BullMQ, Redis, Baileys, shadcn/ui

End-to-end SaaS CRM platform comparable to WATI/Respond.io — built solo from architecture to production.

- Architected a multi-tenant system supporting multiple businesses, each managing WhatsApp conversations with assigned agents, roles (Admin, Agent, Analyst), and per-team configuration.
- Built a real-time inbox with Socket.IO (team-scoped + personal rooms), typing indicators, message reactions, reply quoting, emoji picker, and sound/browser notifications.
- Implemented a full automation engine with 10+ trigger types (KEYWORD, FIRST_MESSAGE, OUTSIDE_HOURS, NO_RESPONSE_TIME, etc.) and multi-step flows using BullMQ delayed jobs.
- Developed a broadcast campaign system with BullMQ-backed scheduling, tag-based contact segmentation, pause/resume, randomised send delays, and recurring campaign support.
- Created a visual drag-and-drop template builder with 7 block types (Text, Buttons, Media, Promo, Product, Reminder, Support) and a preset library of 9 templates.
- Built a full deals pipeline (CRM), task/follow-up management, contact timeline, tag workspace, and analytics dashboard with agent KPIs and avg. first-response time tracking.

GPT-3 — Modern Pixel-Perfect Landing Page

React, Modern UI, Responsive Design

Pixel-perfect implementation of a modern landing page with precise layouts, spacing, and responsive behaviour across devices.

[Live Demo](#) [GitHub](#)

Startify — Startup Landing Page Platform

React, Responsive UI

Modern landing page template focused on UX, layout consistency, and performance optimisation.

[Live Demo](#) [GitHub](#)

ELITE GPT — AI Legal Assistant

React, MongoDB, Hugging Face, SCSS

AI-powered legal assistant delivering contextual responses using NLP models with scalable frontend architecture.

[GitHub](#)

LamaBooking — Hotel Booking System (MERN)

React, Node.js, Express, MongoDB, JWT

Full-stack hotel booking system with authentication, reservations, and availability management, full admin panel.

[GitHub](#)

Movies Flex — Movie Discovery Platform

React, Tailwind CSS, TMDB API

Movie discovery platform enabling users to browse, search, and explore trending content.
